Purpose: - New web based technology for development of regional languages people for more easy internet surfing.

Problem: - Huge people have regional languages and mostly domain name of websites are English. They can not access information and education from Internet due to this problem.

Methods: - 1. Type in the address bar any three keys twice continuously, right to left and press Ctrl+Enter, example ppooii.com, ooiuuu.com, iuuuyy.com, llkkjj.com (.com = Ctrl+Enter) see picture.

You will see a web page of <http://atoall.com> with multiple languages. Select own language and get education or information.

2. Government and private websites will paste a code from this link '<http://atoall.com/2/m/new.asp>' then all these websites will be open more easily for regional language people. Multiple websites can use this technology also.

Results: - By this new invention regional languages people access education and information from Internet more easily.

Implications: - 1. Education boards must implement this new invention to include in computer science syllabus and curriculum. Computer book publishers must publish it in computer science books.

2. Government and private websites will paste a code from this link '<http://atoall.com/2/m/new.asp>' then all these websites will be open more easily for regional language people. Multiple websites must use this technology also.

Additional materials: - 1. This new invention is approved and appreciated by multiple educational boards and Governments link 'http://atoall.com/asp/teaching_technology.asp'.

2. Approved by State Council of Educational Research and Training (SCERT), Andhra Pradesh, Government.
