

Paste Web Accessibility Tool of Atoall.com on Your Websites

Problem

- Alphabets of domain names are away from each other and in 1 language.
- So Regional 2 billion of the world disabled 1 billion of the world can not open websites easily.

Solution

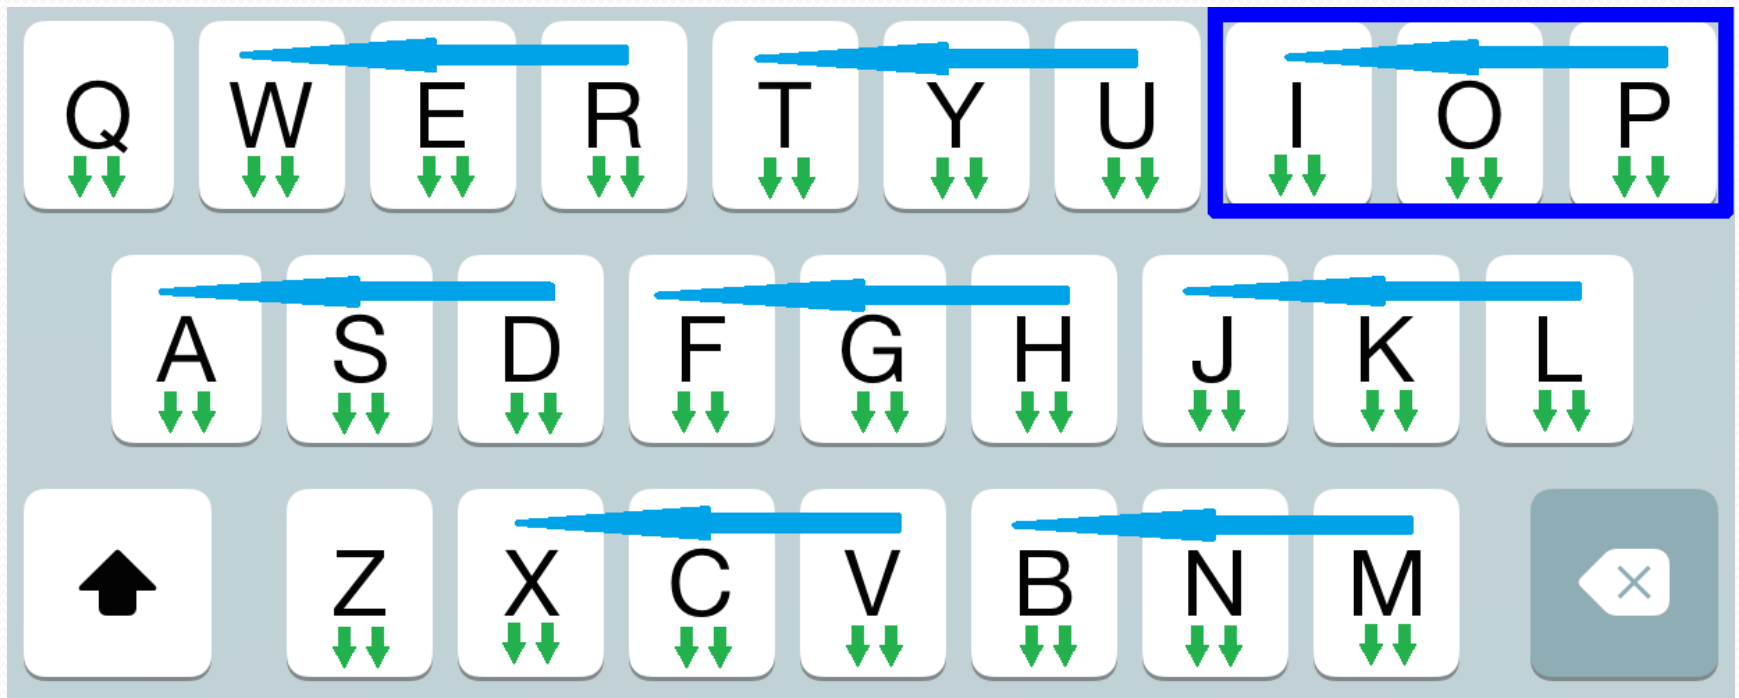

- Websites will paste a code from Atoall.com
- Users can open their websites by typing any 3 keys like ppooii.com or kkjjhh.com

How it works DEMO?

- OPEN a Website that is using this tool.

- **NGU.ac.in**

Now press any 3 keys those are together on the keyboard. Example Ppooii.com

- Ppooii.com

- You will see

ngu.ac.in again

Government and private websites will use it due to law also

- This will support to
- Digital world
- Language rights
- Accessible to all
- GDP- Growth for company
- Information technology ICT
- Education for all
- Etc.
- It will give benefits to 1 billion people approximately.

Fines !

- If a website causes discrimination, ignoring accessibility, then huge fines are possible. There are many laws for disability, language rights, ICT, Human Rights, accessibility etc. This tool also impacts on these areas.
